# ALMANACK

For the

Year of Christ, 1681.

Being the first after the Bissextile or Leap-year.

And from the Creation of the World 5630 Years.

The Death of our Saviour 1638 years.

The Conquest of William Duke of Normandy  
615 years.

The Flood of Noah 3974 years.

LONDON was built 2788 years.

The Restauration of King Charles II. 21 years.

LONDON was burned 15 years.

Wherein is contained

A true Description of the Year, and of the severall parts thereof, according to the *English* and *Foreign* Account, with a just account of such Eclipses as will happen this year, As also the place of the Sun and Moon, with their Rising and Setting, and the Moon's Southing; with a Prediction of the Weather in every month; Also severall necessary Tables and other Observations of worth. With a *Chronology* of all such memorable Actions as hath passed, to this present year.

CALCULATED.

For the Meridian of the Ancient and Famous City of London, whose Latitude is 51 degrees and 32 minutes, and may serve without sensible error for any part of England.

Collected and Published by

LANCELOT COELSON,

Student in Physick and Astrology

LONDON.

Printed by J. Grover for the Company of Stationers.

# Moveable Feasts for the present year of our Redemption, 1681.

Would men be just on Terms, we need not stand,  
But live in Love and Peace throughout the Land.  
Now Law with Tricks of Knaves is so beset,  
The Suit proves worse than losing of the Debt.  
Hag't, hang't refer the Cause, and cease your Fury,  
Two friends will do as well as Judge and Jury.

TO THE

Truly Worshipful and most Worthi:  
ly Accomplish'd;

JOHN FRIEND

OF

*Clapton* in the Parish of *Hackney*  
in the County of *Middlesex*, Esq;

One of the Farmers and Mana-  
gers of His Majesties Revenue of  
EXCIZE.

And Major of the Trained  
Bands in the *Hamlets* of the  
Tower of *LONDON*.

*Lancelot Coelson,*

IN Testimony of his Gratitude for his  
many Favours received, and the honour  
he bears to him and his Vertuous Consort,  
humbly Dedicates this his Astronomical and  
Astrological Recreations for the year of our  
Lord God, 1681.

Some rigid Spirits cry down Usury,  
 And against Interest as Extortion cry;  
 But let those peevish *Dons* forbear their Rants,  
 For how shall poor men else supply their Wants.  
 Interest may be given, but this I'll say,  
 'Tis all mens Interest to keep their day.

# COELSON, 1681.

A Table shewing the quantity of the Moons shining, with the true time of her coming to the South.

The Days Age for her shining			The Days Age for her southing.

## The use of the TABLE.

*To find the time of the Moons shining.*

First enter the Table with the Moons Age in the first Column on the left hand, and in the second Column you have the quantity of her shining.

*Example*

On the 9th day of *Novem.* this year, 1681. I find the Moon is 10 days old, at which time I desire to know how long the Moon shineth; first I find 10 in the first Column of the Table, and over head the Moons Age for her shining, and against 10 the Moons Age, I find in the second Column 8. 0. over head H. M. for hours and minutes, so that the Moon doth shine at the time given compleat 8 hours no minutes on the 9th day of *November.*

*To find the Moons coming to the South.*

Enter the Table with the Moons Age in the 3 Column, and in the 4 Column you shall have the time at which the Moon cometh to the South.

*Example.*

*Example.*

The Moon being 13 days old, I would know what time she will be full South; I enter the Table in the third Column under the Moons Age for her Southing for 13, and against it in the 4 Column I find 10, 24. which tells me, that the Moon will be that day which I propose full South just at 24 min. past 10 of the Clock.

So also when the Moon is 24 days old, she will that day be full South at 12 minutes after 7 in the morning, and so of all the rest.

*A plain and easie Rule to find the Moons  
Rising and Setting.*

**A**T the New Moon she Riseth and Setteth with the Sun.  
At the Full Moon she Riseth when the Sun Sets, and Sets when the Sun Riseth.

At the beginning of her Increase, she Riseth after Sun Rising, and sets after Sun Setting.

At the beginning of her Decrease, she Riseth a little after the Sun Sets, and Sets a little before the Sun Riseth.

In the First quarter of her Increase she Riseth about Noon, and Sets about Midnight.

In the Second quarter of her Decrease she Riseth about Midnight, and Sets about Noon.

Observe only, that she riseth every day slower than the other by 48 minutes.

This will serve very well for Common Use.

*Poor Luna she is utterly undone*

*When she doth want the presence of the Sun,*

*God through darkeſt Clouds doth caſt an Eye*

*To ſee, and circumvent all Villany.*

*Thoſe Eggs which Hell hath hatch't in her black bower*

*Will all prove adle in the day of Power.*

der of Sir *Edm. Godfrey*, 1679

## Monthly Observations.

Nothing certain under  
the Sun, the Month begins  
with general satisfaction  
to all our good and wor-  
thy Citizens, but on a sud-  
den very uncertain News  
arrives from many parts of  
*Europe*, which occasions  
great discourse among the  
people in general, old fore-  
bodings begin to break out, not  
being well healed, which  
a good Chirurgeon knows  
will be very oft. Here is an  
opposition of the Sun and  
Mars, and an opposition  
of Mars and Mercury, and  
a Quartile of Jupiter and  
Mercury, some great Mar-  
tial persons are now con-  
cerned, for certainly these  
Configurations will pro-  
duce some remarkable Ef-  
fects, and will fall between  
persons of some Quality:  
Time will discover all the  
Intrigues.

# March hath xxxj Days.

Last quarter the 2 day, about 10 before noon.  
 New Moon the 10 day, about 1 in the morning.  
 First quarter the 16 day about 7 at night.

## ALMANACK

For the Year of our Lord God, 1681.

Being the first after the *Bissextile* or *Leap-year*.

Wherein you have an Account of such  
Eclipses as will happen this Year;

With several Necessary Tables, and other things  
worthy to be observed, useful for all sorts of  
People.

With some brief Predictions upon the Sun his En-  
trance into *Aries*, *Cancer*, *Libra*, and *Capricorn*.

AS ALSO

A Chronography of the 4 Quarters of the Year.  
With a Chronology of the Late and Present Times.

---

*Collected, Composed, and Published;*

By **LANCELOT COELSON**,  
*Student in ASTROLOGY and PHYSICK.*

---

*Fili autem Seth disciplinam Rerum Cælestium & or-  
natum earum primitus invenerunt, ————— (Jo-  
sephus.)*

---

L O N D O N,

Printed for the Company of Stationers, 1681.

## Of the Eclipses this Year, 1681.

**T**Here will happen to the Inhabitants of this Terrene Globe this Year, four Eclipses, two of the Sun and two of the Moon; but we in this British Island, shall only behold the latter Eclipse of the Moon, the rest not to be seen by us: (In order thus.)

The first will be of the Moon, and will happen on the 22 day of February in 15 degrees of *Pisces*, about our 11 of the Clock before noon, and will be visible to our Antipodes.

The second Eclipse will be of the Sun, and will happen on the 10 day of *March*, at our 1 of the Clock in the morning: It happens in the beginning of *Aries*, and will be seen by such as inhabit our Antipodes.

The third Eclipse will be of the Moon, and will happen on the 19 of *August*, about our 3 of the Clock in the morning, in six degrees of *Pisces*, this will be a visible and total Eclipse unto us, and therefore very worthy the observation of those industrious Astronomers amongst us, according to the Doctrine of *Alphonsus*, touching the Causes of Eclipses: The Moon while she labours under this defect, will appear of a blackish colour, mixed with paleness.

The fourth and last Eclipse is of the Sun, and will happen on *September* the second, about our three of the Clock in the morning, in 20 degrees of *Virgo*, it will not be visible to us, and but a small Eclipse where it is to be seen.

## Of the four Quarters of the Year.

**T**He Spring takes his beginning when the Sun toucheth the first Scruple of *Aries*, which happens this year upon the 9 day of *March*, 48 minutes past 8 of the Clock at night.

This Season by Nature is hot and moist, the most temperate time of the year, a very convenient time to take

take Physick, to unburthen Nature of all such humours as do oppress her, either by purging, bleeding, or other-ways, as occasion shall permit. This Quarter the Body of man is incident more than at other times, to Fevers, Jaundies, Imposthumations, Swellings, Quinsies, Boils, Itch, Pulses, Pox, Bleeding at Nose, Spotted Fever, and such other Diseases occasioned by the Quantity or Quality of Blood.

*Now Sol doth make the Earth look like a Queen,  
And cloath her in a Mantle all of Green;  
The Flowers, the Fruits so spring they are not nice,  
This dark dull Earth looks like a Paradise.*

*Of the Summer Quarter.*

THIS Quarter takes its beginning when the Sun toucheth the first scruple of the Tropical sign Cancer, causing longest day and shortest night to all on this side the Equator, which happens this year on the 10 day of June 21 minutes past 11 of the Clock at night.

This Season by Nature is hot and dry, causing the humours of man to be suitable to his own nature, fatts Cattle, and brings all Fruits to ripeness, increasing the rich man's store, and maketh the Earth fat with the Bodies of Men, Women and Children, by reason of so many Diseases now subject to Nature (*viz.*) Burning Fevers, Phrensies, Inflammations, Imposthumations, Ulcerations of the Lungs and Bladder, Heat in the Reins, the Gonorrhœa, Iliack Passion, and such Diseases, as proceed from Choler.

*All things delight and now are full of pleasure,  
Nature produces all her Mines of Treasure:  
Let us not fix our minds on Earthly Toys,  
But tast the Fruit of everlasting Joy.*

## Coelson 1681.

### *The Autumn Quarter.*

**T**His Quarter takes its beginning when the Sun toucheth the first scruple of the sign *Libra*, which happens this year, on the 12 day of *September* 55 minutes past 2 of the Clock in the afternoon.

This Season is very variable and unconstant, causing warm dayes but cold nights, and the body of man as incident to bad Diseases, as at any time of the year (*viz.*) *Fistulaes*, *Fluxes*, *Hemorrhoids*, *Dysenteries*, pain of the Back, Side and Stomach, occasioned by Wind, *Palkies*, *Convulsions*, pain in the Reins, *Stone*, *Suppression*, *Madness*, & *Distraction*, occasioned by *Melancholy*, *Obstructions* of the *Spleen*, and such Diseases occasioned thereby.

*The Barn is fill'd, the Farmer hath his own,  
And each man reaps the Seed which he hath sown;  
The Landlord he will give thee what is thine,  
He that sows Love, on Love shall sweetly dine.*

### *The Winter Quarter.*

**T**His Quarter takes its beginning when the Sun toucheth the first scruple of the Tropical sign *Capricorn*, being then declined farthest from us, & makes our shortest days & longest nights to all on this side the *Aequator*, which happens this year on the 11 day of *December*, 58 minutes after 2 of the Clock in the morning.

This Season by Nature is cold and moist, no great pleasure to the weary Travellers, and causeth many *Obstructions* in the Bodies of old People, and others, who are incident to receive *Colds*, *Coughs*, *Rheums*, *Epilepsies*, *Apoplexies*, *Colicks*, *Hoarseness*, *Fluxes*, *Pain* in the *Teeth*, *Noise* in the *Ears*, *Agues* of all sorts.

*Winter is come, Old Age doth bow and bend;  
And now the World is almost at an end;  
The old Man he hath summ'd up all his days,  
The little Child sweetly in his Cradle plays;  
All must come to the cold Tomb early or late,  
Happy are they that are Regenerate.*

# Coelson 1681.

From the beginning of the Year unto the 18 day of June, the Glorious Planet *Venus* is our bright evening star, thence (having made her Conjunction with the Sun) she becomes Oriental, our glorious morning Star, so continuing to the end of the Year.

A Tide-Table to know when it is full Sea by the Age of the Moon, at any of these places here under named.

Excess and Riot make a poor man poorer,  
 If thou desire'st to be a Whisky Storer;  
 Th' Gold an' Silver is not lost, but lent  
 With large increase, which on the poor is spent.

A very necessary table whereby knowing the price of the Pound  
you may know the price of the Hundred weight; and knowing  
the price of the Hundred weight, you also have ready the price  
of the Pound according to the 112 Pound to the Hundred.

Now near at hand is the great day of doom,  
Both Prince and People muſt to judgment come;  
The Judge ſits on the Bench each cauſe to try,  
Bribes will not blind the quick All ſeeing Eye:  
Thou canſt nor play thy Game out of his ſight,  
Thy deeds of darkneſs they muſt come to light.

That

# Coelion 1681.

That the Stars and Planets are secondary Causes of Generation, Corruption, Production, and Consummation of all things in this sublunary and elementary world, is most certain; and sure then of far greater use than to give an obscure light, or for mankind to gaze at.

As to its Antiquity, *Josephus* tells us, the sons of *Sab* first invented how to understand the motions of the heavenly bodies, and that he saw the Art of Astrology graven in stone in *Assyria*, done by *Sab* before the Flood, which makes it very probable, if not evident, that *Adam* had authorized the work, and pained their way before them, but the Children of *Sab* ripened it into an Art of discipline.

Therefore we may venture to give our judgment upon

## Coelfon 1681.

on the preceding Figure of the Sun his Ingress into *Aries*, and of the rest in order.

We have  $\text{♂}$  Lord of the 6<sup>th</sup>, inclining into the 10<sup>th</sup> house to a  $\square$  of  $\text{♂}$  in the 8<sup>th</sup>, and Lord of the 5<sup>th</sup>, where the  $\text{♂}$  is with the  $\text{♀}$ , which signifies sickness and death to young Children; as also frequent abortives, trouble and perplexion to Princes and their Nobility, in *Greece*, and some parts of *France*, many turbulent Actions, but I hope peace at home, (*viz.*) *England* will be preserved, by reason of a Trine Aspect which happens between  $\text{♂}$  and  $\text{♀}$  Lady of the Ascendant, and the  $\oplus$  so neer to the Cusp of the Ascendant disposed of by  $\text{♀}$  also, who is well posited and strong: Many Princes want treasure, but prove deceitful among their Allies and Confederates:  $\text{♂}$  is in the 9<sup>th</sup> in  $\text{♄}$ , and the  $\text{♀}$  is with the  $\text{♂}$ , strong endeavours are made in some parts of the world to alter Religious Constitutions, but  $\text{♀}$  who is Lady of the Ascendant i. in  $\ast$  to  $\text{♂}$ , such their intentions are discovered, and I hope prevented.

In the figure of the Sun's Ingress into  $\text{♄}$ ,  $\text{♂}$  is Lord of the 10<sup>th</sup>, and ascendant in  $\text{♂}$  with  $\text{♀}$  Lord of the 3<sup>d</sup>, 4<sup>th</sup>, and 7<sup>th</sup>:  $\text{♂}$  in the 7<sup>th</sup> in  $\ast$  to  $\text{♂}$  Lord of the 3<sup>d</sup> from the 16<sup>th</sup>, there will be great correspondences between foreign Kings and Princes, (*viz.*) *Flanders*, *Brabant*, and *Germany*, &c. which may occasion much trouble and perplexity among the common people: God preserve his Majesty, and keep us from commotions at home, and let the honest laborious Husbandmen be careful to mind both their great and small Cattle, to keep them from the Rot and other Diseases, to which they will be very incident, but all sorts of Grain at a reasonable price:  $\text{♂}$  is in the 6<sup>th</sup>, in  $\text{♂}$  to the 12<sup>th</sup>, and  $\text{♂}$  in his Detriment, combust, and perigreen.

In the figure of the Sun his entrance into *Libra*, we have the ascendant in  $\ast$  to the ascendant of the preceding figure,  $\text{♂}$  is very strong and Lord of the figure, and in  $\Delta$  to  $\text{♂}$  in the 7, and there is a  $\ast$  between  $\text{♂}$  and  $\text{♀}$  Lord of the 5<sup>th</sup>, strong in his own house, and in  
his

## Coelion 1681.

his exaltation, and with the Dragons head, from which we may expect some good conclusions, if not of a sudden our hopes blasted with some private under-hand dealing amongst some persons interested in matters of State:  $\eta$  is in the 7<sup>th</sup> with  $\zeta$  who is Lady of the 4<sup>th</sup>, and disposatrix of the part of Fortune, all will I hope end well.

The price of Grain seems to heighen, Cattle also bears a good price, and so doth all manner of provisions, the  $\varphi$  is in the 2<sup>d</sup>, the poor are very needy, mony scarce by reason of the badness of Trade, which makes the commontry grumble, but I hope no tumultueus commotion will follow, yet the people are much burthen'd; the  $\nu$  separates from a  $\star$  of  $\delta$ , and applyes to an  $\delta$  of  $\eta$ .

In the figure of the Sun his Ingrels into  $\varphi$ , we have the Angles fixed,  $\odot$  Lord of the 10<sup>th</sup> is in  $\star$  to the Ascendant, and the  $\nu$  in  $\delta$  to the Ascendant, and in  $\square$  to  $\eta$ , matters now under debate upon the Stage of the world, are subject to an ill procedure and as bad a conclusion: God preserve us from tumultuous insurrections, the industrious Mariner unprosperous in long voyages, by violent stormy weather;  $\eta$  is in  $\delta$  to the 4<sup>th</sup>, and therein the  $\varphi$  posited, the two superiors  $\eta$  and  $\varphi$  Retrograde in the 9<sup>th</sup>, Journeys by Land infested with Thieves committing many robberies,  $\delta$  is in the 3<sup>d</sup>, and  $\varphi$  in the 2<sup>d</sup> from the 3<sup>d</sup>, and  $\varphi$  squares the part of Fortune, there is yet a dearth of Corn, and many poor people reduced to great want, yet are there great endeavours used to supply those wants which at present are too frequent: Many Embassadors from foreign Princes, great muttering and private discourses among people of all ranks and qualities, being very much possessed with fears and jealousies of some ensuing trouble, some foreign news affrights us, but without any substantial ground: True it is very uncertain news doth arrive from many parts of Europe, great preparations and marching of Armies among our Neighbour Nations, from one place to another, not without acts of hostility

in some measure or other; neither can such configurations as happen in the heavens this year, pass without the production of some remarkable effects. God bless our English Nation from Epidemical Diseases, and from all her enemies both at home and abroad, there is very great debates under consideration: God bless and direct the great Council of the Nation, who are in those weighty concerns, many controversies about Religion, and daily expectation of some happy conclusion of what hath lately been under debate, some persons in authority are very industrious to contribute what they may for the future happiness of this Nation, &c.

I having for some years together given you a brief discourse of Meteors in my Almanacks annually, from Mr. Vincent Wing his *Computatio Catholica*, and the judgments of several others upon those discourses of Meteors, (*viz.*) of Frost and Dew, of the Rainbow, of Thunder, of Lightning, Snow, Rain, and Hail. I promised in my last to conclude with the causes and other concomitants of Earthquakes, which is occasioned when much wind is gotten into the bowels and concavities of the Earth, and afterwards breaking forth, causeth the Earth to quake, and sometime casteth up the Earth by the windy eruption of the windy exhalation into the air, and other times it causeth the land to sink a great depth, swallowing up whole Cities and Towns, and also great Hills and Mountains leaving in the room thereof either great holes or lakes of water: This in brief, being confined within my limit of paper.

## ADVERTISEMENT.

*Courteous Reader,*

**T**He're are to acquaint you that for the relief of such as are diseased, I am continually at home to be spoken with every day, from 7 in the morning till noon or longer, at my House, at the sign of the Royal Oak  
by

## Coelkon 1681.

by the Postern Well near the Tower of London, and hath one door open into *George Yard*, a passage way between little and great Tower-hill, where you may by your Urine or otherwise, have an account of any sick person what the distemper is and Medicines ready prepared both Chymical and Galenical, which, with the blessing of God, will work a good effect.

He prepares an excellent Medicine. viz. *Elixir Vita*, which gives present relief in all or most distempers, although of long continuance.

I can also furnish you with the great Cordial Antidote of the ancient Philosopher's, *Van Helmont*, *Paracelsus* and *Crollius*, called by them *Elixir Proprietatis*, which is the only Balsam and medicine in the world for long and sound Life, restoring Nature even at the point of death.

The bottles are sold at 4 s. the ounce bottle, and 2 s. the half ounce bottle, with printed notes as to its use and particular vertues.

He hath also an incomparable Pill, which cures the Scurvy, Dropfie, or any Venereal distemper with a Powder that kills all sorts of Worms in old or young, at reasonable rates.

Whereas since the decease of Dr. *Lockyer*, many have been at a loss to know where his true Universal Pill is to be had; which is so famous in all his Majesties dominions and plantations. by the cures it hath wrought in the Scurvy, dropfie, stone, consumption, aches and limeness of the limbs, all sorts of agues and fevers, gripings of the Guts, &c. this is to certify that it is only prepared by Mr. *Watts* his Nephew in *St. Thomas's Southwark*; and Mr. *Fox* Apothecary without *Bishopsgate*, London, whom he appointed his only Trustees for the same after his death.

Whereas there are lately started up several pretenders to spirits of Scurvygrass, we are assured that the only true spirit thereof both plain and the Golden purging, are those published by Mr. *Robert Biteman*, who was the  
first

## Coelson 1681.

first Author, and for many years hath faithfully prepared the same, being highly approved and famous for their admirable cures in the scurvy, drop sic, and several other general distempers: To be sold at his house in *Paul's Chain* near *Doctors Commons London*, and most eminent Towns in the Country, with printed directions for their use, the Bottles are all sealed with his Coat of Arms, the Half Moon and Ermins, to prevent counterfeits, price one shilling each bottle.

*In laudem Authoris*, upon the preceding Almanack.

Let the world know thou writ'st not in the dark,  
Thy last years Almanack hath hit the mark;  
To tell us to a day thou didst not fail,  
When we should have a thundring shower of hail.

Prophetick *Coelson*, this we clearly find,  
Some blessed Star must sure instruct thy mind;  
Go on and prosper, till thou dost aspre  
A fixed Angel in that heavenly Quire.

We now shall see in this years Almanack,  
The worlds foundations how they shake and crack;  
Such strange Catastrophes will intervene,  
Which former Ages never yet have seen.

T. S.

From my House, at the sign of the Royal Oak, near  
the *Postern* on *Great Tower-Hill*, *London*.

July 10<sup>th</sup>.  
1680.
